

Driven by Security

Auto dealerships lack the luxury of securing their inventory like other businesses, leaving millions of dollars' worth of products vulnerable to theft in open car lots.

The profitability of dealerships is directly affected by each lost or damaged vehicle or part. With the rapid escalation of theft, vandalism, and cybersecurity threats, and the growing ingenuity of criminals, protective measures are crucial. However, the solution must be simple. Security incidents require dealerships to navigate cumbersome procedures, paperwork, repair damaged vehicles, file reports and claims, and manage protocols, consuming time, effort, and resources, impacting daily operations and profits.

Other challenges include:

- ✘ Trespassing and excessive loitering
- ✘ Perimeter security risks
- ✘ Vandalism and destruction
- ✘ Increased liability

Typical approaches to tackle these issues involve the use of video surveillance systems and security guard services. But these strategies lack the capacity to preemptively halt crimes. What dealerships truly need is an efficient, economical, and proactive strategy that can mitigate threats, limit liabilities, and thwart criminal activities before they transpire.

Proactive video monitoring presents a streamlined, cost-effective solution that offers vigilant, expansive, live surveillance of auto dealerships — designed to proactively mitigate risks and stop crime.

Netwatch | Immediate Intervention and Reliable Prevention

To eliminate the opportunity for threats, theft, and liabilities, dealerships require a reliable solution capable of identifying and discouraging unwanted activities. Netwatch remote video monitoring services offer highly effective and cost-efficient solutions, boasting savings of up to 80% compared to physical security guards.

Proactive video monitoring serves as an effective remedy to common security concerns, providing continuous, comprehensive surveillance that deters potential criminals and eliminates the need for 24/7 guard services. By implementing PVM, dealerships can enhance security, reduce risks, and safeguard their inventory. An AI and cloud-based service, Netwatch detects threats, issuing immediate audible warnings and personalized audio alerts to discourage criminals, achieving a 98% incident prevention success rate.

“ Netwatch Proactive Video Monitoring is more efficient than a traditional guard, covering more territory with better accuracy. It’s highly reliable in any weather. Consistent, uninterrupted service with timely updates. We choose Netwatch to protect our locations, and they offer valuable video storage and assistance, including working with authorities.

Karla Curtsinger, GM JLR Riverside

With a proven history of **preventing more than 125,000 crimes**, Netwatch ensures proactive protection. Leveraging more than 20 years of experience, the system delivers immediate interventions, steadfast 24/7 protection, and peace of mind.
