Grow in Confidence

Proactive video monitoring
for cannabis businesses

You can't protect your premises all the time, but we can...

Video Security Monitoring for the Cannabis Industry

Protect Your Dispensary & Growth Facility

Netwatch offers more than just video surveillance – Netwatch provides a proactive solution, preventing crime, ensuring compliance and offering operational efficiencies. Many traditional forms of security, such as video surveillance, only record events as they happen -- by the time you become aware of the incident the damage is done.

At Netwatch, we know the Cannabis industry and understand the unique requirements of your security needs. From the rigorous license processes, to ensuring you are compliant and ready for the time-consuming audits, to providing the day-to-day protection for your business across location sites - Netwatch is primed to help your business grow.

Why Netwatch Proactive Video Monitoring?

24/7 Video Monitoring

Augment Guard Services

Liability Protection

Audio/Visual Deterrents

Netwatch Proactive Video Monitoring provides you with the peace of mind knowing your site locations – from dispensaries to manufacturing to remote grow sites – are safe and secure. Our team keeps up with changing laws and regulations, ensuring the technology and services we offer will cover cannabis compliance for each state. If your site perimeter is breached, an Intervention Specialist at one of our US-based monitoring centers addresses the intruders with a live audio warning. This live, real-time audio intervention has demonstrated a 98% efficacy rate in deterring crimes. Our software ensures that verified threats are transmitted within seconds to our Monitoring Centers, allowing our Intervention Specialists to intercede before any crime is committed.

netwatchsystems.com

Our experience with a Netwatch system has been very positive. We had the system installed at both our cultivation facility and dispensary. The level of professionalism, care and expertise definitely contributed to our success in the regulatory process and in obtaining local approval.

They provided a comprehensive package that ticked all our boxes, as well as all of the regulatory requirements, which was critical in complying with the State of Massachusetts.

The solution made the complex undertaking of developing a state-of-the-art security system for our facilities a smoother, less stressful and even enjoyable experience.

Karen Hawkes,
Director of Security & Diversion Prevention, Garden Remedies
